TRAN THANH QUANG

SOFTWARE ENGINEER | FULL-STACK DEVELOPMENT

Ho Chi Minh City, Vietnam | 0964 407 450 | tranthanhquang.hvt@gmail.com
github.com/QuazG119 | facebook.com/tq10824

PROFILE

Software Engineer with nearly one year at FPT Telecom building and shipping enterprise platforms used by 4,000+ field technicians and 400+ operations managers nationwide. Full-stack experience with Vue.js/Nuxt.js and ASP.NET Core supports a quality-focused approach to test design, API verification, and root-cause analysis. Collaborative contributor to reliable nationwide releases.

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer Mar 2026 - Present

FPT Telecom

- Contribute to geospatial and workforce solutions supporting 4,000+ technicians, 400+ managers, and 10,000+ deployment tickets nationwide.
- Build interactive Vue.js/Leaflet mapping modules displaying thousands of incidents and tens of thousands of infrastructure assets.
- Develop backend services and enterprise integrations with ASP.NET Core, MediatR, Redis, Apache Kafka, and Oracle.
- Modernize legacy Blazor WebAssembly applications with Vue.js/Nuxt.js, improving frontend scalability, maintainability, and user experience.
- Collaborate with frontend and backend teams on nationwide production releases, focusing on performance and reliability.
- Use Codex and Gemini to analyze legacy workflows, research geospatial technology, investigate performance issues, and support migration and integration design.

COLLABORATION

Cross-functional teamwork with frontend and backend teams. Focus on reliable delivery, performance, maintainability, and continuous learning in software architecture and test automation.

EDUCATION

Software Engineering
Nguyen Tat Thanh University
2022 - 2026 | Bachelor's degree program

CERTIFICATES & AWARDS

MOS Specialist
Microsoft Word, Excel, PowerPoint (2025)

English
Technical reading and basic communication

Academic Encouragement Scholarship
Recognized across semesters (2023 - 2025)

TECHNICAL SKILLS

Frontend
Vue.js, Nuxt.js, Vuetify, TypeScript, Leaflet

Backend & APIs
C#, ASP.NET Core, REST APIs, MediatR, Background Services

Data & messaging
Oracle, SQL Server, EF Core, Dapper, Redis, Elasticsearch, Apache Kafka

Quality
Test case design, bug reporting and verification, Postman, Chrome DevTools, root-cause analysis

SELECTED PROJECTS

Bus Ticket Booking
Booking, schedules, reservations, and live availability.
C#, Node.js, JavaScript

Cinema Management System
Movie scheduling, ticketing, seat selection, and admin dashboard.
ASP.NET Core MVC, SQL Server, Bootstrap

Shop-shoe
Backend APIs for a shoe-shopping website.
.NET Core Web API, Entity Framework
